**Cc:** 5.1.2e Future-Proof

**Subject:** Article 37 document Precips

---

All,

Hereby a short summary of the items discussed on site with ODRN.

**Attendees:**

- 5.1.2e (ODRN)
- 5.1.2e (ODRN)
- 5.1.2e (ENGIE)
- 5.1.2e (BAM)

On site we assessed the situation of the E-filters/Precips,

**Ducts at DeNox side**

We went to see the ducts on the DeNox side.

Initially we thought we couldn't reach the top part of the duct for asbestos removal.

While carrying out the removal of tin and rockwool we managed to reach all parts of the duct, even the top part.

Therefore, we do not need to use the Article 37 document for this part of the plant.

**Duct in between the E-filters.**

For the duct in between the E-filters we need to use the Article 37 document.

It is not possible to remove the asbestos safely in the current situation.

We agreed on displacing the duct to ground level and remove the asbestos on ground level.

The Article 37 document will be used for this part of the job.

Removal of the duct and removing the asbestos will be carried out before the blow down.

The other asbestos materials mentioned in the survey can and will be removed before the blow down of the E-filters.

Best regards,

5.1.2e | Project Manager
